#### **DETAILED ACTION**

### **Drawings**

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Figure 1 (132), Figure 4A (300) and (306). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 2622

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6, 10-13, 15, 19, and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6148148 to Wain et al.

Regarding claim 1, Wain discloses a system for selecting a particular size image to print, comprising: a computer adapted to receive an electronic image file (see column 6 lines 58-67), and a photograph generation software component in communication with the computer, the photograph generation software component adapted to analyze the electronic image file and present to a user a plurality of image formats from which the user selects a desired format (see column 7 lines 1-46).

Regarding claim 10, Wain discloses a method for selecting a particular size image to print, the method comprising the steps of: providing an electronic image file to a computer (see column 6 lines 58-67 and column 7 lines 1-46), selecting the electronic image file (see column 7 lines 29-46), and presenting to a user a plurality of image formats from which the user selects a desired format with which to print the selected electronic image file (see column 7 lines 9-13 and line 58-column 8 line 5).

Regarding claim 19, Wain discloses a method for printing a passport format image, the method comprising the steps of: providing an electronic image file to a computer (see column 6 lines 58-67 and column 7 lines 1-46), selecting the electronic image file (see column 7 lines 29-46), scaling the selected image file based on a predetermined print format, the predetermined print format corresponding to a passport photograph format (see column 8 lines 24-29), and printing the selected image file in the passport photograph format (see column 7 line 53-column 8 line 5).

Art Unit: 2622

Regarding claims 2 and 11, Wain discloses the system discussed in claims 1 and 10, and further discloses a printer adapted to print the electronic image tile in the selected image format (see column 7 line 58-column 8 line 5).

Regarding claims 3 and 12, Wain discloses the system discussed in claims 2 and 11, and further discloses wherein one of the plurality of image formats is a passport size photograph (see column 7 lines 9-13).

Regarding claims 4 and 13, Wain discloses the system discussed in claims 1 and 10, and further discloses wherein the image format is chosen from the group consisting of wallet size, visa size, 4"x6", 5"x7", and 8"xl0" (see column 7 lines 9-13 and column 9 lines 20-34, reference states the option of a portrait size picture which is known to be of a conventional size such as 4"x6", 5"x7", or 8"xl0" and reference also teaches the ability to take pictures of full length standing or seated poses and therefore the claimed element is anticipated by the reference).

Regarding claim 6 and 15, Wain discloses the system discussed in claims 1 and 10, and further discloses wherein the photograph generation software component allows a user to customize the image format (see column 8 lines 6-29).

Regarding claim 23, Wain discloses the system discussed in claim 19, and further discloses wherein the electronic image file corresponds to a photograph (see column 7 line 29-column 8 line 5).

Art Unit: 2622

### Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 5, 7, 14, 16, 20, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wain as applied to claims 1, 10, and 19 above, and further in view of U.S. Patent Application Publication No. 2001/0004406 to Enomoto.

Wain does not disclose expressly (*claims 5, 14, and 20*) wherein the photograph generation software component automatically selects an image format and (*claims 7, and 21*) wherein a user of the photograph generation software component selects a portion of the electronic image file to be printed in the desired format.

Enomoto discloses (*claims 5, 14, and 20*) wherein the photograph generation software component automatically selects an image format (see paragraphs [0078], [0080], [0083]-[0087], and [0104]-[0111]) and (*claims 7, 16, and 21*) wherein a user of the photograph generation software component selects a portion of the electronic image file to be printed in the desired format (see paragraphs [0083]-[0087]).

Wain & Enomoto are combinable because they are from the same field of endeavor, generation of passport photographs.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the automatic image format selection and main subject extraction of Enomoto with the system of Wain.

Art Unit: 2622

The suggestion/motivation for doing so would have been to provide the correct print size generation after a user selects the portion of the picture that is to be printed.

Therefore, it would have been obvious to combine Enomoto with Wain to obtain the invention as specified in claims 5, 7, 14, 16, 20, and 21.

Claims 8, 17, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wain as applied to claims 1, 10, and 19 above, and further in view of U.S. Patent Application Publication No. 2001/0026633 to Abdel-Mottaleb et al.

Wain does not disclose expressly a face recognition software component configured to select a portion of the electronic image file to be printed in the desired format.

Abdel-Mottaleb discloses a face recognition software component configured to select a portion of the electronic image file to be printed in the desired format (see paragraphs [0026]-[0043]).

Wain & Abdel-Mottaleb are combinable because they are from the same field of endeavor, manipulation of digital images.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the face recognition method of Abdel-Mottaleb with the system of Wain.

The suggestion/motivation for doing so would have been to provide a passport photograph generation system that would ensure the picture that was taken by the user was actually one of the head and shoulders.

Art Unit: 2622

Therefore, it would have been obvious to combine Abdel-Mottaleb with Wain to obtain the invention as specified in claims 8, 17, and 22.

Claims 9, 18 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wain as applied to claims 1, 10, and 19 above, and further in view of U.S. Patent No. 6226105 to Fukushi.

Wain does not disclose expressly a scanner including the photograph generation software component.

Fukushi discloses a scanner including the photograph generation software component (see column 6 lines 37-63).

Wain & Fukushi are combinable because they are from the same field of endeavor, processing images by selected size.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the scanner of Fukushi with the system of Wain.

The suggestion/motivation for doing so would have been to allow a preexisting photograph to be used to generate a passport photo.

Therefore, it would have been obvious to combine Fukushi with Wain to obtain the invention as specified in claims 9, 18, and 24.

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. To further show state of the art refer to U.S. Patent numbers 6453078 (Bubie et al.), 6687020 (Hanagami et al.), 6408132 (Ishikawa), and 5828461

Art Unit: 2622
